

UNDERSTANDING THE TOOLS

Make Figurines using AI for 3D printing

How easy and free it is

Use ChatGPT's Image Generation or Midjourney to Make a Toy Plastic Figure

- Upload or Choose an Image
 - Start with a clear photo (portrait, object, etc.).
 - Choose an image with clear edges and lighting. Front-facing photos work best for 3D conversions.
- Request the Toy Plastic Style
- Ask ChatGPT:
 - “Convert this image into a toy-style plastic figure. Keep features but simplify and smoothen as if molded in plastic.”
- I will generate a stylized, cartoony, toy-like version of the photo with:
 - Smooth edges
 - Bright colors
 - Plastic-like reflections
 - Minimal textures

Make chibi style guys in a pool in tube smoking cigar 3D models
